

Addendum 1

01-30-2023

- 1) The Form 470 still has the 11 à la carte stack cables listed, which are usually included with the switch.
 - If the switch comes with the stack cables, we do not require 11 additional cables.
- 2) The Form 470 doesn't have any transceivers, even though the pricing sheet has 10x 10G SFP+ transceivers included.
 - The transceivers need to be added to the form 470.
- 3) The Form 470 only has 13 wireless access points, while the pricing sheet has 25 total (13 MR46 and 13 MR76)
 - We need 13 MR42 or equivalent WAPS and 12 MR74 or equivalent WAPS.
- 4) The pricing sheet shows wireless access point models: MR44 and MR74- both are end of sale, will submitting the equivalent supported generation be acceptable?
 - Equivalent generation of hardware is acceptable.
- 5) The redundant power supply is not erate eligible.
 - Yes, that is correct. E-rate will not cover backup equipment. Uninterruptible power supplies are listed as eligible.

Reminder: Recommended site walk this Friday February 3rd at 9am. Please meet outside the front entrance at 8:50am. Evergreen Library: 5000 County Highway 73, Evergreen 80439

Thank you,
